# Automate & Optimize Your 3PL

Rufus + Packiyo are joining forces to provide a ready-to-deploy WMS, Labor Management System, MDM & Barcode Scanning Hardware in one monthly subscription.

getrufus.com/packiyo

Say hello to Packiyo, an intuitive, easy to use, and super dependable, modern WMS platform. Packiyo enables brands & 3PLs to achieve fast and accurate fulfillment, correct inventory, all while backed by knowledgable & responsive humans that are committed to your success.

Intuitive features for dependable warehouse operations

Built for Humans

Easy & intuitive from the ground up. We design every feature & interaction to minimize distractions & mistakes.

Connected & Synced

Connect sales channels, shipping carriers & other platforms. Packiyo connect engine keeps it all synced.

Co-pilot automation

Packiyo Co-Pilot gives you powerful automation capabilities for those repetitive tasks.

Mobile Smart Pick

Running Android, the Packiyo mobile app integrates seamlessly with Rufus Android Devices to keep your pickers on the right path and moving fast

Fast pack & ship flow

Talking of fast, we've optimized the pack & ship station for less thinking, more doing.

Shipping & Returns

Mapped shipping methods, optimized rates with quick label printing as well as returns right out of the box.
